

General

CSQ3® helped to insure that a work effort was not moved along without the proper quality control and that there was coordination between the commercial and technical components. An energizing and empowering change to the company.

Cost Savings in one department alone was \$240 million per year. That's roughly a 20% capital cost savings, year after year!

In addition to improved performance I've noted significant improvements in the clarity of roles and degree of teamwork. I strongly support CSQ3®'s approach and methodology.

Fundamental aspects of CSQ3® have delivered substantial performance results. CSQ3® is applicable to any organization.

Workshops

Workshop was excellent and timely...I learned a great deal and was able to use the outcomes.

Well done...for getting engineers, scientists and accountants on to the same page. Great Workshop!

I was impressed at how well the workshop put us through our paces and made us move on when we were "stuck in the mud" on some difficult topics.

High value and actually neat approach to framing up a work effort.

The workshop accelerated our planning process. It helped organize a complex set of ideas into a manageable group of tasks. Workshop Value: "10 out of 10".

The workshop resulted in agreement as to point forward game plan --- something we have NEVER agreed to before. Therefore, the workshop was a resounding success.

I have not gone through training yet, so this was an eye-opener for me. I came away believing in the process; the process assures that no issue or potential problem is left unturned. I just wish we could have employed it on many past problems. A great job, especially considering the diverse group we had.
